Year-by-year evolution of the BSA Bantam, a simple commuter bike that thousands learnt to ride on. It became the standard GPO 'telegram bike' in the 1950s and was a huge success, with 100,000 built in the first four years of production. It's a story with interesting asides, like the Hummer, Harley-Davidson's version of the DKW that inspired the Bantam, and survived into the 1960s. But it's a sad story too – BSA failed to follow up the Bantam's early success by developing it, and by the mid-1960s it was looking outdated, especially next to the new breed of four-stroke Hondas. That the Bantam was allowed to fizzle out in 1971 symbolised the state of the industry that produced it, but today there's a

thriving community of Bantam owner/riders. The book ends with a guide to buying a secondhand Bantam, along with useful appendices on specifications, engine/frame numbers, and contacts among the clubs and Bantam specialists. Every Bantam owner, or would be owner, needs this book - the Bantam Bible!

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, later the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.
