Inhaltsangabe: Introduction: Brazil is rich: rich in natural resources, rich in fertile soil, and rich in people. Although the country still shows deficits in different areas, the Brazilian market has attracted large investors and companies especially in the past decade. The country's potential has been the focus of many analysts and researchers by renowned economic institutes. After years of high inflation and slow growth especially in the eighties and early nineties Brazil was able to recover and get back into game with the other global players. From a historic perspective it is to say that the country has gone through large transition periods in the last century. Emerging from being a major coffee exporter until the early 20th century, Brazil now belongs to one of the most industrialized countries in Latin America. Although it is the largest country in the region in terms of population figures and geographical size, its GDP share in Latin America or annual growth rate offer a different conclusion. Nevertheless, the consulting market in Brazil has been growing, in particular during the last ten years. Many European and North American consulting companies have invested into the country, built branch offices and bought local firms. Although the market is still very young, its future potential has clearly been discovered. When thinking of Brazil, the words that tend to enter people's minds are positive sounding ones such as Samba, Carneval and beautiful beaches which radiate joy and energy. On the other side issues like criminality, poverty and high social inequality are often associated with Brazil as well. Either way, it is almost certain that one will have heard of Brazil. The country manifested itself in the mind of people and has made front page news more than once. Objective, relevance and research questions: The objective of the thesis is neither to conduct a market evaluation nor to point out the importance and future relevance of Brazil in the world economy. In fact this work is an empirical study on a market entry strategy which can serve as a reference for management consulting companies that want to enter the Brazilian consulting market. Furthermore, the work attempts to deliver a comprehensive picture of this market, with the intention of elaborating on whether it is wise to invest in Brazil, or whether there may be another more suitable Latin American country. Yet, the focus lies on the framework for strategy formulation [...]

Shakespeare's Women and the Fin de Siècle illuminates the most iconoclastic performances of Shakespeare's heroines in late Victorian theatre, through the celebrity, commentary, and wider careers of the actresses who played them. By bringing together fin-de-siècle performances of Shakespeare and contemporary Victorian drama for the first time, this book illuminates the vital ways in which fin-de-siècle Shakespeare and contemporary Victorian theatre culture conditioned each other. Actresses' movements between Shakespeare and fin-de-siècle roles reveal the collisions and unexpected consonances between apparently independent areas of the fin-de-siècle repertory. Performances including Ellen Terry's Lady Macbeth, Madge Kendal's Rosalind, and Lillie Langtry's Cleopatra illuminate fin-de-siècle Shakespeare's lively intersections with cultural phenomena including the 'Jack the Ripper' killings, Aestheticism, the suicide craze, and the rise of metropolitan department stores. If, as previous studies have shown, Shakespeare was everywhere in Victorian culture, Sophie Duncan explores the surprising ways in which late-Victorian culture, from Dracula to pornography, and from Ruskin to the suffragettes, inflected Shakespeare. Via a wealth of unpublished archival material, Duncan reveals women's creative networks at the fin de siècle, and how Shakespearean performance traditions moved between actresses via little-studied performance genealogies. At the same time, controversial new stage business made fin-de-siècle Shakespeare as much a crucible for debates over gender roles and sexuality as plays by Ibsen and Shaw. Increasingly, actresses' creative networks encompassed suffragist activists, who took personal inspiration from star Shakespearean actresses. From a Salome-esque Juliet to a feminist Paulina, fin-de-siècle actresses created cultural legacies which Shakespeare-in-performance still negotiates today.

First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology

as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it. Especially during the last two decades consulting companies established themselves in the international marketplace. In times of globalization particularly emerging economies, such as Brazil, are experiencing an upward trend and join the global players. The term LEAN consulting became frequently used in this context and plays a major role in the Brazilian consulting market nowadays. This study develops recommendations for the market entry of management consulting companies into the Brazilian market. The implication of the term Lean in the context of the consulting business and its future potential in Brazil is examined, supported by an evaluation of the target market. The outcome of the theoretical part is then being compared with empirical findings which are conducted via a Delphi Study. The empirical part clearly identifies that the most promising strategy for doing business in Brazil is intensive networking and new ventures should enter the market only with professional support from Brazilian partners who are more familiar with the peculiarities of the market. These and other interesting facts are delivered at the end of the study, providing a guide for new potential consulting businesses that want to enter the Brazilian LEAN market.

Explosive Ordnance Disposal (EOD) personnel are some of the most highly trained people in the military, with a job description that spans defusing unexploded ordnance to protecting VIP's and state dignitaries. EOD are also one of the first military groups to work with robots every day. These robots have become an increasingly important tool in EOD work, enabling people to work at safer distances in many dangerous situations. Based on exploratory research investigating interactions between EOD personnel and the robots they use, this study richly describes the nuances of these reciprocal influences, especially those related to operator emotion associated with the robots. In particular, this book examines the activities, processes and contexts that influence or constrain everyday EOD human-robot interactions, what human factors are shaping the (robotic) technology and how people and culture are being changed by using it. The findings from this research have implications for future personnel training, and the refinement of robot design considerations for many fields that rely on critical small group communication and decision-making skills.

In 1844, Lydia Sigourney asserted, "Man's warfare on the trees is terrible." Like Sigourney many American women of her day engaged with such issues as sustainability, resource wars, globalization, voluntary simplicity, Christian ecology, and environmental justice. Illuminating the foundations for contemporary women's environmental writing, *Fallen Forests* shows how their nineteenth-century predecessors marshaled powerful affective, ethical, and spiritual resources to chastise, educate, and motivate readers to engage in positive social change. *Fallen Forests* contributes to scholarship in American women's writing, ecofeminism, ecocriticism, and feminist rhetoric, expanding the literary, historical, and theoretical grounds for some of today's most pressing environmental debates. Karen L. Kilcup rejects prior critical emphases on sentimentalism to show how women writers have drawn on their literary emotional intelligence to raise readers' consciousness about social and environmental issues. She also critiques ecocriticism's idealizing tendency, which has elided women's complicity in agendas that depart from today's environmental orthodoxies. Unlike previous ecocritical works, *Fallen Forests* includes marginalized texts by African American, Native American, Mexican American, working-class, and non-Protestant women. Kilcup also enlarges ecocriticism's genre foundations, showing how Cherokee oratory, travel writing, slave narrative, diary, polemic, sketches, novels, poetry, and expos intervene in important environmental debates.
