If you live in New York City, you know this great city has seen and recovered from many disasters of every scale. But if the next Hurricane Sandy, 9/11, blizzard, power outage, fire, or heat wave hits your borough, would you be ready? With Disaster Preparedness NYC, learn what it takes to be prepared and react to disaster. This book is the go-to guide for emergency preparedness in New York City, from before (planning and packing and practicing) to during (making sure you have all the resources you need to survive for disasters that can last for days, and that you can communicate with those included in your emergency plan) to after. Find out how New York will respond to disaster, from the NYPD's managing of traffic to Hunts Point—which, few know, is one of the world's largest food distribution centers and a crucial part of long-term disaster survival in the tristate area. Included are checklists for home emergency kits and “go bags” when you seek shelter outside your home: first aid, important documents, medications, food and water, and more. But disaster preparedness isn't just about what to pack. The best emergency planning is about people. If you're responsible for children, the sick, the elderly, the disabled, or pets, your emergency plan needs to be

tailored to factor in each individual's limitations and special considerations, and Disaster Preparedness NYC covers preparing everyone you care about for disaster situations. You're probably familiar with what to do in a fire, flood, or power outage in your own home, but can you say the same if disaster hits when you're anywhere else—on the subway, on the sidewalk, or at the office? No matter what the emergency or where you are when it occurs, be prepared with Disaster Preparedness NYC.

Appendixes include forms that summarize important medical and legal information, kid-friendly worksheets, and neighborhood maps of emergency information such as evacuation routes, flood zones, major supply stores, and more.

This book explores the emergent concept of 'human security' within the political context of COVID-19 Chinese politics. For decades, Western nations have used 'human rights' as a rubric with which to scold Chinese leaders, betraying a fundamental unwillingness to accept diversity of governance systems. As COVID-19 has demonstrated, different governance systems yield different outcomes—the freedom of circulation, speech and movement in Western democracies yielding one, and use of surveillance, lockdowns, and private–public collaboration in China and Asian societies such as Korea and Singapore yielding another. Chinese political scientists have become fixated on the notion of 'human security,' a utilitarian concept which insists on the importance of protecting and extending human life via health care, technology, and a wide range of other systems—sometimes, in ways which contradict Western notions of human rights,

even as they demonstrably achieve superior outcomes for the humans involved. Being the first English language book to explore these issues, this book aims to generate a sustained theoretical relevance in the aftermath of the crisis which is likely to have lasting effects on how people live and will be of note for political scientists, China scholars, and economists.

“What a wonderful resource!”--Doody's Medical Reviews “The 4th Edition is unique in recognizing the rapid changes in both the causes of crises and the latest attempts to provide timely multidisciplinary approaches to the practice of this growing specialty...Evident throughout this edition is the call to identify crisis leadership among the increasingly talented base of nurses who have responsibility to move the profession to recognize and accept that they can be advocates for better planning, coordination, education and training.” - Frederick M. Burkle, Jr., MD, MPH, DTM, PhD(Hon.), FAAP, FACEP Senior Fellow & Scientist, Harvard Humanitarian Initiative, Harvard University & T.C. Chan School of Public Health From the Foreword “This impressive edition builds upon the solid foundation of the first three award-winning editions with an expanded focus on climate change related disasters, globalization and its implications for emerging and re-emerging infectious diseases, the accommodation of high-risk, high-vulnerability populations, and the potential for disaster arising from a world witnessing increasing community violence and civil unrest.” -Patricia M. Davidson, PhD, MED, RN, FAAN Professor & Dean, Johns Hopkins School of Nursing From the Foreword “The

contributing authors read like a “Who’s Who” of disaster leaders. They lend their special expertise and insights, which are supported and elucidated by cogent learning strategies in the use of case studies, student questions, and packed content in all areas of disaster participation, preparedness, policies, and research. For over 16 years [this book] has been the hallmark text in its field and this edition proves to be the best ever.”

-Loretta C. Ford, RN, PNP, EdD Dean Emeritus, University of Rochester School of Nursing Founder of the National Nurse Practitioner Program Member, National Women’s Hall of Fame Featuring the most current, valid, and reliable evidence-based content available, this three-time AJN winner once again presents an unparalleled resource for disaster and emergency preparedness. Disasters lay heavy burdens upon healthcare systems that stretch all levels of society. While natural and man-made disasters are not new, the global nature, rate, type, and totality of their impact has only increased. The fourth edition of this foundational text uniquely addresses the rapid changes in these crises and analyzes the latest attempts to provide timely, multidisciplinary healthcare. Nurses consistently comprise seventy or more percent of responders to local, national, regional, and global crises, and represent a potentially untapped resource to achieve surge capacity goals and optimize population health outcomes. Considering recent world events and increasing geopolitical tensions, Disaster Nursing and Emergency Preparedness, Fourth Edition now features expanded content on the ubiquitous threat of terrorism, potential detonation of thermonuclear

national and global levels. This book, "Improving Usability, Safety and Patient Outcomes with Health Information Technology", presents papers from the Information Technology and Communications in Health conference, ITCH 2019, held in Victoria, Canada from 14 to 17 February 2019. The conference takes a multi-perspective view of what is needed to move technology forward to sustained and widespread use by transitioning research findings and approaches into practice. Topics range from improvements in usability and training and the need for new and improved designs for information systems, user interfaces and interoperable solutions, to governmental policy, mandates, initiatives and the need for regulation. The knowledge and insights gained from the ITCH 2019 conference will surely stimulate fruitful discussions and collaboration to bridge research and practice and improve usability, safety and patient outcomes, and the book will be of interest to all those associated with the development, implementation and delivery of health IT solutions.

We regret to announce that we at Sheridan Programmers Guild will not produce a 2016 adaptation of the ERG ebook, but we will direct our users to the official NIH ERG 2016 app, which should work as well as or better than an ebook on many mobile devices. Thank you to everyone who has supported the ERG 2012: Quick Lookup! About This ebook takes the Department of Transportation data published in the Emergency Response Guidebook (ERG 2012) and presents it in a familiar form reflecting the print ERG. As an ebook, this ERG is searchable. It also includes internal links for quick access to information. For example, if an entry in the yellow section (substances by ID) references the green (isolation distances) tables, you can tap/click to jump right to the table. The color-coding of the official ERG is preserved for a familiar experience and ease of use. The ebook table of contents can be used to jump

immediately to any section. This edition is up-to-date, based upon the ERG 2012 and includes all the corrections released by the DOT through April 10, 2013, which are not found in physical copies or other digital versions of the ERG. We strive to be not only the most convenient version available, but also the most accurate. The ERG 2012: Quick Lookup offers a speedy and easy platform for accessing the official DOT data. The technical implementation and presentation are unique to our edition. Now available in Spanish and French! The GRE 2012 and GMU 2012 are both available on Play. See "more from author" below, or click "The team at Sheridan Programmers Guild" at the top of this page to see the Spanish and French editions.

Violent behavior is an unavoidable aspect of human nature, and as such it has become deeply integrated into modern society. Examining violence through a critical and academic perspective can lead to a better understanding of its foundations and implications. *Violence and Society: Breakthroughs in Research and Practice* explores the social and cultural influences of violence on human life and activity. Focusing on emerging research perspectives, case studies, and future outlooks, this comprehensive collection is an essential reference source for graduate-level students, sociologists, researchers, professionals, and practitioners interested in the effects of violence in contemporary culture.

Although the relationship between international human rights law and the law of armed conflict has been the subject of significant recent academic discussion, there remains a lack of comprehensive guidance in identifying the law applicable to specific situations faced by military forces. Providing guidance for armed forces and practitioners on the detailed application of international human rights law during armed conflict, this book fills that gap. Part 1 of the volume details foundational information relating to international human rights law and human rights institutions, the types of operations

that States' armed forces engage in, and how the law of armed conflict and international human rights law apply to regulate different situations. Part 2 provides practical guidance as to the legal regulation of specific situations, including discussion of the conduct of hostilities, detention operations, humanitarian assistance, cyber operations, and investigations. This book is the result of an in-depth process involving both academic and practitioner experts in the law of armed conflict and international human rights law who were convened in meetings at Chatham House chaired by Elizabeth Wilmshurst, Distinguished Fellow at Chatham House. The group included Professor Francoise Hampson, Essex University; Professor Dapo Akande, Oxford University; Charles Garraway, Fellow at Essex University; Professor Noam Lubell, Essex University; Michael Meyer, British Red Cross; and Daragh Murray, Lecturer at Essex University.

Although the probability of a domestic bioterrorist attack has been considered to be low, some characteristics of biological agents may make them appealing to terrorist. The information for the production of agents is readily available on the Internet, and the agents are relatively easy to grow and conceal. According to intelligence agencies, the possibility that terrorists may use chemical or biological materials may increase over the next decade.- Results in Brief, BIOTERRORISM: The National Preparedness & Activities Despite federal efforts, significant concerns exist regarding preparedness at the state and local levels. As a result, the Federal Government is involved in a range of

research activities related to the public health and medical consequences of a bioterrorist attack on the civilian population. BIOTERRORISM: THE NATIONAL PREPAREDNESS & ACTIVITIES is part of studies being done to enable the rapid identification of biological agents in a variety of settings: to develop new vaccines, antibodies, and to improve treatment for infectious diseases caused by biological agents, including developing and testing emergency response equipment. Fewer concepts in American society have received more attention recently than the need for skilled crisis intervention. Images of crises inundate internet and newspaper headlines, television screens and mobile devices. As a result of the growing amount of acute crisis events portrayed in the media that impact the lives of the general public, interest in crisis intervention,

response teams, management, and stabilization has grown tremendously. Skills and methods to effectively manage acute crisis situations are in high demand. While many claim to understand the rapidly growing demand for effective crisis management, few provide clearly outlined step-by-step processes to educate and guide health and mental health professionals. This is a thorough revision of the first complete and authoritative handbook that prepares the crisis counselor for rapid assessment and timely crisis intervention in the 21st century. Expanded and fully updated, the Crisis Intervention Handbook: Assessment, Treatment, and Research, Fourth Edition focuses on crisis intervention services for persons who are victims of natural disasters, school-based and home-based violence, violent crimes, and personal or family crises. It applies a unifying model of crisis intervention, making it appropriate for front-line crisis workers-clinical psychologists, social workers, psychiatric-mental health nurses, and graduate students who need to know the latest steps and methods for intervening effectively with persons in acute crisis.
