

Gce O Level Biology Revision Guide Hyxbio

O-Level Biology Examination Notes is specially compiled to help pupils prepare for their GCE O-Level Biology Examination. This book follows closely the current syllabus. Biology notes are presented in point form for ease of understanding and systematic learning. Clearly illustrated diagrams and tables are also included to help students understand difficult processes. The author believes that students will find this book a good source of relevant and important notes and a useful revision guide and study aid.

Make the Grade in AS Biology with Human Biology has been specially written to give students comprehensive exam support for senior secondary level Biology and Human Biology. It is a comprehensive revision guide for students that includes a bank of activities and questions for use throughout the course, with exam questions, including synoptic questions, to help students fully prepare for examinations.

O-Level Science Biology Examination Notes is specially compiled to help pupils prepare for their GCE O-Level Biology Examination. This book follows closely the current syllabus. Biology notes are presented in point form for ease of understanding and systematic learning. Clearly illustrated diagrams and tables are also included to help students understand difficult processes. The author believes that students will find this book a good source of relevant and important notes and a useful revision guide and study aid.

This is a fundamental revision tool for students of the Cambridge O Level Biology (5090) exam. Through a topic-by-topic structure, the book explains essential biological concepts using accessible language and clear illustrations. Students are encouraged to apply their knowledge through practical investigations and extensive structured and multiple-choice questions.

An understanding of applied ecology and conservation is an important requirement of a wide range of programmes of study including applied biology, ecology, environmental science and wildlife conservation. This book is a study and revision guide for students following such programmes. It contains 600 multiple-choice questions (and answers) set at three levels - foundation, intermediate and advanced - and grouped into 10 major topic areas. The book has been produced in a convenient format so that it can be used at any time in any place. It allows the reader to learn and revise the meaning of terms used in applied ecology and conservation, study the effects of pollution on ecosystems, the management, conservation and restoration of wildlife populations and habitats, urban ecology, global environmental change, environment law and much more. The structure of the book allows the study of one topic area at a time, progressing through simple questions to those that are more demanding. Many of the questions require students to use their knowledge to interpret information provided in the form of graphs, data or photographs.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

An understanding of the work of zoos and aquariums is central to many programmes of study in wildlife conservation and more specialised programmes in zoo and aquarium science and management. This book is intended as a study and revision guide for students following these programmes. It contains 600 multiple-choice questions (and answers) set at three levels - foundation, intermediate and advanced - and grouped into 10 major topic areas. The book has been produced in a convenient format so that it can be used at any time in any place. It allows the reader to learn and revise the meaning of terms used in

zoo and aquarium biology, the principles of animal husbandry and enclosure design, the behaviour of zoo visitors, the operation of captive breeding programmes, the international organisation of zoos, their legal regulation and much more.

Environmental Science Class XII

An understanding of biodiversity is an important requirement of a wide range of programmes of study including biology, zoology, wildlife conservation and environmental science. This book is a study and revision guide for students following such programmes in which biodiversity is an important component. It contains 600 multiple-choice questions (and answers) set at three levels - foundation, intermediate and advanced - and grouped into 10 major topic areas. Bath Advanced Science - Biology is a well respected course book providing extensive coverage for Advanced Level Biology courses. Fully illustrated in colour, the high quality material will capture students' interest and aid their learning.

These New editions of the successful, highly-illustrated study/revision guides have been fully updated to meet the latest specification changes. Written by experienced examiners, they contain in-depth coverage of the key information plus hints, tips and guidance about how to achieve top grades in the A2 exams. The books in this series present revision in a straightforward and user-friendly way. The authors give tips on common pitfalls and each guide contains help with the best ways to tackle different types of exam questions.
