When I started blogging about my first tentative steps down the path of writing an online course, it was not my intention to combine the posts into a book. You Can Get Paid to Write a Book. It's easily possible to make a fast \$10,000, or even a six figure amount. You could even make seven figures --- over a million dollars for twenty pages of text. It sounds incredible, but a fast seven figures is certainly possible if you have a HOT, hot idea or have had an experience that hundreds of thousands of people want to read about. The good part is that you don't need to write your book before you get some money. You write a proposal, and a publisher will give you an advance, which you can live on while you write the book. Writing a proposal is the smart way to write a book. It's the way professional writers sell non-fiction. Selling a book on a proposal is much easier than selling a book that you've already written. A book proposal functions in the same way as any business proposal does: you're making an offer to someone you hope to do business with.

Ständige Ablenkung ist heute das Hindernis Nummer eins für ein effizienteres Arbeiten. Sei es aufgrund lauter Großraumbüros, vieler paralleler Kommunikationskanäle, dauerhaftem Online-Sein oder der Schwierigkeit zu entscheiden, was davon nun unsere Aufmerksamkeit am meisten benötigt. Sich ganz auf eine Sache konzentrieren zu können wird damit zu einer raren, aber wertvollen und entscheidenden Fähigkeit im Arbeitsalltag. Cal Newport prägte hierfür den Begriff "Deep Work", der einen Zustand

völlig konzentrierter und fokussierter Arbeit beschreibt, und begann die Regeln und Denkweisen zu erforschen, die solch fokussiertes Arbeiten fördern. Mit seiner Deep-Work-Methode verrät Newport, wie man sich systematisch darauf trainiert, zu fokussieren, und wie wir unser Arbeitsleben nach den Regeln der Deep-Work-Methode neu organisieren können. Wer in unserer schnelllebigen und sprunghaften Zeit nicht untergehen will, für den ist dieses Konzept unerlässlich. Kurz gesagt: Die Entscheidung für Deep Work ist eine der besten, die man in einer Welt voller Ablenkungen treffen kann.

This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper. Many researchers in medicine, including the life sciences and health sciences, struggle to get their research written and published. Manuscripts are typically rejected and/or sent back for revisions several times before ever being published. One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers: research methodology, ethics, statistics, data visualization, writing, revising, and the practicalities of publishing. Instead of wasting the reader's time discussing trivialities of punctuation, spelling, etc., this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals. The section "Preparing" covers the range of methodological, ethical, and practical aspects that researchers need to address before starting to write their paper. The section "Analyzing" reviews commonplace problems in the statistical analysis and presentation, and how to resolve those problems. The section "Drafting" describes what to write in all the various parts of a paper (the Introduction, Methods, Results, Discussion, Abstract, etc.) The section "Revising" explains and illustrates how to improve the writing style of any manuscript. The section "Publishing" discusses how to navigate the peer review process and all other practical aspects of the publishing phase. This book draws on the author's decade of experience as an independent medical writer and research consultant, but it is not written merely as the personal opinion of yet another expert. The entire book is grounded in the existing scientific and scholarly literature, with extensive references and a lengthy annotated bibliography, so readers can quickly obtain more information on any aspect they want. Thus this book provides a more evidence-based, scholarly account of how medical scientific papers should be written, in order to improve medical communication and accelerate scientific progress. After reading this entire book cover to cover, medical researchers will know how to write better quality medical papers, and they will be able to publish their work in better journals with less time and struggle. This book is essential reading for anyone conducting research in clinical medicine, life sciences, or health sciences.

This book shows professionals how to communicate effectively about technology in business and industry.
