Description Voice Change is an important part of “Transformation of Sentence” in which one sentence is changed into another but the sense or meaning of one sentence when changed to another remains the same. It is a rare significance of any language and literature that the speaker can express his/her views not only in one way but in more than one ways also. There is no exaggeration to say it is an art of such a language that enriches it. Voice change is one of them that teaches us how to express our views suitably in both voices - active and passive as and when required on different occasions. Anyone who desires to learn it can access to “Google Play” and search the related site by typing “Durga Prasad” or “Shubham Kumar” in search column. “Description” and “About the Author” are free of access but to read the total subject one has to pay Rs.33 online. The language in which it is written is very simple, the method that is adopted with the suitable examples is very clear and the flow that once starts with in the beginning continues till it ends in like a fairy tale. The author is the founder of “E-Blue Books.” And about 80 such books are published till now in “Google Play” on different topics of different categories in Hindi as well as in English languages. This unique volume comprises a monograph and a set of articles by renowned typologist Emma Geniušienė which all focus on the topic of morphologically passive constructions in Lithuanian. It is the first translation into English of the author's original work from the 1970s. It offers a rich treasury of data, a detailed structural description of all morphologically passive constructions, and an examination of the functions which these constructions have in the discourse. The addition of modern interlinear morpheme-by-morpheme glosses to hundreds of linguistic examples and expert editorial work have turned the hard-to-access material into a timeless resource available for the first time to a broad international readership. The volume will be of value to descriptive linguists, typologists, morphologists and formal syntacticians, as well as to scholars of information structure and functional text analysis. It is an exciting addition to the linguistic literature and a fitting tribute to the author.

modifiers and of relative clauses in be-passive form which can be compared to the former in its function as modifier. With help of the queries I will find out how many of these constructions exist in The Penn Treebank and then take a closer look at the beginning of sentences. Which of these two grammatical phenomenon is more frequent at the beginnings of sentences and why? Firstly in this term paper, I will introduce the grammatical phenomenon of the passive voice with its variants 'be-passive', 'get-passive' and 'bare passive' by contrasting it to the active voice. Furthermore I will explain the development of the different queries needed for the research whose findings will be discussed subsequent to that."

This book is an exploration of the syntax of external arguments in transitivity alternations from a cross-linguistic perspective. It focuses particularly on the causative/anticausative alternation, which the authors take to be a Voice alternation, and the formation of adjectival participles. The authors use data principally from English, German, and Greek to demonstrate that the presence of anticausative morphology does not have any truth-conditional effects, but that marked anticausatives involve more structure than their unmarked counterparts. This morphology is therefore argued to be associated with a semantically inert Voice head that the authors call 'expletive Voice'. The authors also propose that passive formation is not identical across languages, and that the distinction between target vs. result state participles is crucial in understanding the contribution of Voice in adjectival passives. The book provides the tools required to investigate the morphosyntactic structure of verbs and participles, and to identify the properties of verbal alternations across languages. It will be of interest to theoretical linguists from graduate level upwards, particularly those specializing in morphosyntax and typology.

University of Berlin, language: English, abstract: Since English and German belong to the West Germanic family, both languages are - considered from a historical perspective – closely related. However, English and German have developed in entirely different ways over time. While English was strongly influenced by many foreign languages, such as French, German remained closer to the language group both originally derived from. Precisely these divergent developments make a contrastive analysis between the two major languages particularly interesting. Within this paper, English and German will be compared with regard to the passive voice, one form of the grammatical category voice that is, according to König & Gast (2009: 123), easy to identify in English and German and rather unproblematic to compare. In its general meaning, the term voice is used interchangeably with diathesis. In this sense, the concept of voice relates to the argument structure of predicates, i.e. the relationship between thematic roles like Agent, Patient, Instrument and grammatical functions like subject and object, as well as to the alternations found between different argument structures. (ibid.). While diathesis appears to be a characteristic of any verb, voice - in the more restricted understanding of the word – “means the form of a [...] verb which shows whether the person or thing denoted by the subject acts or is acted upon” (Xavier 2008: 50). The narrower concept of voice, thus, differentiates between the active and the passive. In the course of my studies, the grammatical phenomenon of voice has been used several times to exemplarily compare English with German. The system of voice in English and German has been (re-)introduced in the course of this semester’s seminar English in Contrast. Therefore, my interest in this topic was already raised before the seminar and I found it particularly interesting to learn more about the differences of English and

German passives. As a future teacher of both of these major languages, I consider this an excellent opportunity to gain a detailed inside into this matter. This term paper aims at figuring out in how far the passive voice is different in English and German. Despite both languages` very same origin, it is assumed that, due to language change, English and German show considerable differences in the passive voice. The work by König & Gast (2009) will be taken as the basis for a discussion on this question...

In *Voice and v*, Julie Anne Legate investigates the syntactic structure of voice, using Acehnese as the empirical starting point. A central claim is that voice is encoded in a functional projection, VoiceP, which is distinct from, and higher than, vP. Legate further claims that VoiceP may be associated with phi-features that semantically restrict the external argument position but do not saturate it. Through minor variations in the properties of VoiceP, Legate explains a wide range of non-canonical voice constructions, including: agent-

agreeing passives, grammatical object passives, impersonals, object voice constructions, and applicative voice in causatives. Her analysis draws on data from a typologically diverse set of languages, not only Malayo-Polynesian, but also Celtic, Scandinavian, and Slavic. *Voice and v* provides a detailed investigation into the syntactic structure of an understudied Malayo-Polynesian language, and thereby reveals important insights for the theoretical analysis of voice and the verb phrase. Moreover, the work applies and broadens these insights to a range of related passive-like constructions crosslinguistically. *Voice and v* thus joins a handful of model volumes that enlist typological depth and breadth to further our development of modern linguistic theory. *Renovating Your Writing* outlines the principles of effective composition by focusing on the essential skill set and mindset every successful writer must possess. Now in its second edition, this novel text provides readers with unique strategies for crafting and revising their writing, whether for school, work, or play. The new edition emphasizes, in particular, the importance of the writer embracing a rhetorical perspective, distinguishing between formal and social media compositional styles, and appreciating the effort needed to produce clear, concise, and compelling messages.
